Contents of Volume 33

No. 1,2

Annoucement from the Publisher v

J. Aramburu, J. Navas-Castillo, P. Moreno and M. Cambra (Spain)
Detection of double-stranded RNA by ELISA and dot immunobinding assay using an antiserum to synthetic polynucleotides 1

J.R. Hajimorad and R.I.B. Francki (Australia)
Effect of glutaraldehyde-fixation on the immunogenitic, particle stability and antigenic reactivity of alfalfa mosaic virus, and the specificity of elicited antibodies 13

P.D. Swenson, J.T. Riess and L.E. Krueger (U.S.A.)
Determination of HBsAg subtypes in different high risk populations using monoclonal antibodies 27

S. Tang and J.A. Levy (U.S.A.)
Inactivation of HIV-1 by trypsin and its use in demonstrating specific virus infection of cells 39

C.-H.A. Tsai, J.V. Williams and R. Glaser (U.S.A.)
Characterization of two monoclonal antibodies to Epstein-Barr virus diffuse early antigen which react to two different epitopes and have different biological function 47

M. Njayou, M. Aymard and G. Quash (France)
Epidemiology of measles in the Cameroons between 1984 and 1986: comparison of the effectiveness of different serological methods in rural regions 53

H. Takeuchi, M. Baba and S. Shigeta (Japan)
An application of tetrazolium (MTT) colorimetric assay for the screening of anti-herpes simplex virus compounds 61

M.P. Murtaugh, G.F. Lin, D.L. Haggard, A.F. Weber and J.C. Meiske (U.S.A.)
Detection of bovine leukemia virus in cattle by the polymerase chain reaction 73

R.J. Gulakowski, J.B. McMahon, P.G. Staley, R.A. Moran and M.R. Boyd (U.S.A.)
A semiautomated multiparameter approach for anti-HIV drug screening 87

G. Kuno, I. Gómez and D.J. Gubler (U.S.A.)
An ELISA procedure for the diagnosis of dengue infections 101

E.C. Sadasiv, T.T. Yeh and P.W. Chang (U.S.A.)
Protein p*I* alteration related to strain variation of infectious bronchitis virus, an avian *Coronavirus* 115

D.R. Knowlton, D.M. Spector and R.L. Ward (U.S.A.)
Development of an improved method for measuring neutralizing antibody to rotavirus 127

A. Hirano and T.C. Wong (U.S.A.)
Generation of mammalian cells expressing stably measles virus proteins via bicistronic RNA 135

D. Lamy (France)
A microcomputer program simulating rate zonal centrifugation 149

J.T. McClintock, I.-J. Chan, F.E. Taub, A.E. Friedman-Kien and L. Resnick (U.S.A.)
Rapid detection of Epstein-Barr virus DNA in clinical samples of oral hairy leukoplakia with HRP-labeled DNA probes and in situ hybridization 155

W. Zhang and D.H. Evans (Canada)
Detection and identification of human influenza viruses by the polymerase chain reaction 165

M. Battegay, S. Cooper, A. Althage, J. Bänziger, H. Hengartner and R.M. Zinkernagel (Switzerland)
Quantification of lymphocytic choriomeningitis virus with an immunological focus assay in 24- or 96-well plates 191

K.A. Steiner, R.J. Whittington, R.K. Petersen, C. Hornitzky and H. Garnett (Australia)
Purification of epizootic heamatopoietic necrosis virus and its detection using ELISA 199

M. Karan, S. Hicks, R.M. Harding and D.S. Teakle (Australia)
Stability and extractability of double-stranded RNA of pangola stunt and sugarcane Fiji disease viruses in dried plant tissues 211

Y.S. Lee, M.J. Collie, L.K.H. Leung, M. Seidlin and S.T. Beatrice (U.S.A.)
Comparison of Immobilon-N membrane and other membranes for the detection of HIV-1 genome in high risk patients using PCR 217
M.F. Smaron, E. Saxon, L. Wood, C. McCarthy and J.A. Morello (U.S.A.)
Diagnosis of measles by fluorescent antibody and culture of nasopharyngeal secretions 223
Announcement 231

No. 3

J. Rommelaere and J.J. Cornelis (Belgium, France)
Antineoplastic activity of parvoviruses 233
C. Clavel, I. Binninger, M.-C. Boutterin, M. Polette and P. Birembaut (France)
Comparison of four non-radioactive and ^{35}S-based methods for the detection of human papillomavirus DNA by in situ hybridization 253
Om Marquardt, K.-H. Adam and O.C. Straub (F.R.G.)
Detection and localization of single-base sequence differences in foot-and-mouth disease virus genomes by the RNase mismatch cleavage method 267
C.K.Y. Fong and M.L. Landry (U.S.A.)
Advantages of multiple cell culture systems for detection of mixed-virus infections 283
O. Agbede, S. Wahab, D.L. Schutt and H.L. Lucia (U.S.A.)
Performance characteristics of a rapid Western blot assay system for antibody human immunodeficiency virus type 1 291
T.A. Fitzgerald and G.F. Browning (U.K.)
Increased sensitivity of a rotavirus serotyping enzyme-linked immunosorbent assay by the incorporation of $CaCl_2$ 299
B. Spada, K. Biehler, P. Chegas, J. Kaye and M. Riepenhoff-Talty (U.S.A.)
Comparison of rapid immunofluorescence assay to cell culture isolation for the detection of influenza A and B viruses in nasopharyngeal secretions from infants and children 305
S. Nicholson, D.E. Leslie, T. Efandis, C.K. Fairley and I.D. Gust (Australia)
Hepatitis C antibody testing: problems associated with non-specific binding 311
K. Klintevall, K. Näslund, G. Svedlund, L. Hajdu, N. Linde and B. Klingeborn (Sweden)
Evaluation of an indirect ELISA for the detection of antibodies to bovine leukaemia virus in milk and serum 319
N.K. Ayisi, S.V. Gupta and L.F. Qualtiere (Canada, Ghana)
Modified tetrazolium-based colorimetric method for determining the activities of anti-HIV compounds 335
M. Merza, B. Sundquist, J. Söber and B. Morein (Sweden, U.S.S.R.)
Immunoaffinity purification of two major proteins of bovine leukemia virus (gp51 and p24) and their use for discrimination between vaccinated and infected animals 345
T. Wetzel, T. Candresse, M. Ravelonandro and J. Dunez (France)
A polymerase chain reaction assay adapted to plum pox potyvirus detection 355
N.K. Blackburn and T.G. Besselaar (South Africa)
A study of the effect of chemical inactivants on the epitopes of Rift Valley fever virus glycoproteins using monoclonal antibodies 367
J.C. Fox, M. Ait-Khaled, A. Webster and V.C. Emery (U.K.)
Eliminating PCR contamination: is UV irradiation the answer? 375
D.R. Preston, S.R. Farrah, G. Bitton and G.R. Chaudhry (U.S.A.)
Detection of nucleic acids homologous to human immunodeficiency virus in wastewater 383
V. Zachar, V. Mayer, G. Aboagye-Mathiesen, N. Nørskov-Lauritsen and P. Ebbesen (Czechoslovakia, Denmark)
Enhanced chemiluminescence-based hybridization analysis for PCR-mediated HIV-1 DNA detection offers an alternative to ^{32}P-labelled probes 391
